

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing Of Claims:

1. (Currently Amended) A method ~~for providing streaming multimedia advertisements, the method~~ comprising:
building a frame set in a browser window at a user computer, said frame set comprising a media player frame to experience streaming content from a media player executing at said user computer and a data frame;
requesting a playlist from a source on a network;
receiving said playlist, said playlist's contents ~~being other than streaming content and~~ comprising a list of references identifying ~~streaming content that comprises~~ at least one streaming advertisement and media content, wherein ~~each reference includes~~ for each advertisement ~~a reference contained in said playlist includes~~ an indicator that indicates when the advertisement should be played in relation to the media content;
connecting to at least one media server to ~~request~~ ~~retrieve~~ said streaming advertisement and media content from said server using said playlist's ~~contents~~ references;
receiving HTML content related to the requested streaming content in the browser window; and
simultaneously playing said streaming content in said media player frame and displaying said HTML content in the data frame.
2. (Currently Amended) The method of claim 1, wherein receiving HTML content related to the requested streaming content includes providing the HTML content in said data frame in response to execution of an embedded command in the streaming media content, wherein said HTML content is related to the streaming content being experienced in ~~playing on~~ said media player frame.

3. (Cancelled)
4. (Previously Presented) The method of claim 1, further comprising logging play of any advertisement on a server.
5. (Currently Amended) The method of claim 1, ~~wherein receiving includes~~ further comprising:
receiving an embedded script command in the streaming media or advertisement content that references said HTML content related to said streaming media or advertisement content, wherein said HTML content is stored at a remote server.
6. (Previously Presented) The method of Claim 1, wherein the indicator indicates that the advertisement be played one of before, during or after the media content is played.
7. (Previously Presented) The method of Claim 5, further comprising, where the streaming content includes an advertisement, logging the viewing of said advertisement using said script command.
8. (Currently Amended) A method ~~for providing streaming multimedia content, the method~~ comprising:
~~opening a browser window;~~
building a frame set in a ~~said~~ browser window, said frame set comprising a media player frame to experience streaming content from a media player executing at a user computer and a data frame;
requesting a playlist ~~for said media player~~ from a source on a network;
receiving said playlist ~~at said media player~~, said playlist's contents comprise references to ~~which are other than streaming advertisement and media content identify~~ said streaming advertisement and media content, and for each advertisement a

- reference contained in said playlist comprises an identifier identifying when the advertisement ~~content~~ should be played in relation to the media content;
- connecting to at least one media server to request ~~retrieve~~ said streaming advertisement and media content from said at least one media server using said ~~media player~~ and ~~said~~ playlist's contents, wherein said streaming content includes one or more embedded commands that reference[[s]] HTML content corresponding to said streaming content;
- playing said streaming content on said media player;
- executing said one or more embedded commands to retrieve the referenced HTML content; and
- displaying the retrieved HTML content in the data frame concurrently with the streaming content playing on the media player.
9. (Currently Amended) A method for ~~providing streaming multimedia advertisements, the method~~ comprising:
- building a frame set in ~~opening with a browser~~ a browser window, the frame set including a media player frame and a data frame;
- requesting a playlist ~~for said media player from a source on a network~~;
- receiving said playlist, said playlist's contents ~~which are other than streaming media~~ comprise a list of references identifying streaming advertisement and media content, wherein each reference includes for each advertisement a reference contained in the playlist includes an indicator that indicates when the advertisement should be played in relation to the media content;
- connecting to at least one media server to request ~~retrieve~~ said streaming advertisement and media content from said at least one media server using ~~said media player~~ and said playlist's contents;
- receiving ~~pushing~~ HTML content related to the streaming content to the browser;
- simultaneously playing said streaming content on said media player and displaying said HTML content in the data frame.

10. (Currently Amended) The method of claim 9, wherein receiving HTML content ~~pushing~~ includes providing the HTML content to said data frame in response to execution of an embedded command in the streaming media content, wherein said HTML content is related to the streaming content playing on said media player.
11. (Currently Amended) The method of claim 9, wherein receiving the HTML content ~~pushing~~ includes causing embedding a script command embedded into the streaming media or advertisement content that references said HTML content related to said streaming media or advertisement content to be executed, wherein said HTML content is stored at a remote server.
12. (Currently Amended) A method ~~for providing streaming multimedia advertisements, the method~~ comprising:
receiving a request for a playlist;
building a playlist using information included in the request, the playlist's contents are ~~other than streaming media and~~ comprise a list of references identifying streaming advertisement and media content, wherein each reference identifying advertisement content comprises an indicator of when the advertisement should be played in relation to the media content; and
transmitting the playlist to a user computer.
13. (Previously Presented) The method of claim 12, wherein the information comprises identification of a location of information for configuring a frame set, which comprises a media player and a data frame, on said user computer.
14. (Currently Amended) The method of claim 12, further comprising:
in response to a request from the user computer, streaming content to said user computer;
and

providing pushing HTML content related to the streaming content to the user computer, wherein display of the HTML content is synchronized with playback of the streaming content at the user computer.

15. (Previously Presented) The method of claim 14, wherein streaming content to said user computer further comprising:
embedding a script command in the streaming content, wherein the script command references the HTML content.
16. (Currently Amended) A method ~~for execution by at least one server to provide streaming content, the method~~ comprising:
receiving a request for a playlist from a user computer, the request including
advertisement placement information;
building a playlist using the advertisement placement information such that the playlist includes a reference to streaming advertisement content, or a reference to streaming media content which has at least one embedded command including advertisement identification information to be processed as the streaming media content is being experienced at said user computer, or both; and
transmitting the playlist to the user computer.
17. (Previously Presented) The method of claim 16, wherein the advertisement identification information of the command embedded in the streaming media content comprises information to identify streaming advertisement content to be played at said user computer.
18. (Previously Presented) The method of Claim 16, further comprising logging a viewing of said streaming advertisement content.
19. (Previously Presented) The method of claim 16, wherein the playlist further comprises a reference to a streaming media content which has at least one command including

non-streaming content identification information to be processed as the streaming media content is being experienced at said user computer, the non-streaming content identification information of the command embedded in the streaming media content is used to identify HTML content to be displayed while said streaming media content is being experienced at said user computer.

20. (Previously Presented) The method of claim 19, wherein the HTML content is displayed in a data frame of a browser window at said user computer while said streaming media content is being experienced in a media frame of said browser window.
21. (Previously Presented) The method of claim 19, wherein the streaming media content has two embedded commands, the first embedded command identifies first HTML content and the second embedded command identifies second HTML content.
22. (Previously Presented) The method of claim 21, wherein said second HTML content is default HTML content, and said second embedded command is used to display said default HTML content after said first HTML content is displayed.
23. (Previously Presented) The method of claim 16, wherein the request includes advertisement selection information, the method further comprising:
selecting the streaming advertisement content using the advertisement selection information included in the request.
24. (Previously Presented) The method of claim 23, further comprising:
including a reference to the selected streaming advertisement content in the playlist.
25. (Previously Presented) The method of claim 23, further comprising:
modifying the streaming media content to include the embedded command, so that the streaming media content includes the advertisement identification information to identify the selected streaming advertisement content.

26. (Previously Presented) The method of claim 23, wherein the advertisement selection information comprises duration information.
